

**AMENDMENTS TO THE CLAIMS**

**This listing of claims will replace all prior versions and listings of claims in the application:**

**LISTING OF CLAIMS:**

1-9. (Cancelled).

10. (Currently Amended). A pressure-sensitive adhesive sheet, which comprises a backing having provided thereon a pressure-sensitive adhesive layer containing not more than 50 % by weight of solvent soluble matter formed by ultraviolet crosslinking ~~the an~~ ultraviolet crosslinking pressure-sensitive adhesive composition ~~claimed in claim 1, which is produced by~~ mixing a block copolymer (a) wherein at least one styrenic polymer block A and at least one acrylic polymer block B are bound to each other with a triazine derivative (b) containing trichloromethyl group.

11. (Currently Amended): A process for producing a pressure-sensitive adhesive sheet, which comprises

applying to a backing ~~the an~~ ultraviolet crosslinking pressure-sensitive adhesive composition ~~claimed in claim 1, which is produced by~~ mixing a block copolymer (a) wherein at least one styrenic polymer block A and at least one acrylic polymer block B are bound to each other with a triazine derivative (b) containing trichloromethyl group, and

causing crosslinking of the composition by ultraviolet irradiation to form a pressure-sensitive adhesive layer containing not more than 50 % by weight of solvent-soluble matter.
